

ACCESS CONTROL

Safer and More Secure Access Control

Temperature Screening

One of the best ways to mitigate the spread of viruses is to check your team members for elevated temperatures

Face Matching

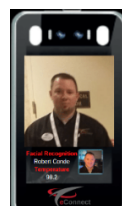

The system will automatically face match those who are authorized to access doors and turnstiles in your facility

Access Control

Each eClear unit comes equipped with the ability to interface with all standard access control systems via relay cable

Person steps up to Door/Turnstile and is instantly face matched while being temperature screened

Integration

Actuator is initiated which unlocks door or opens the turnstile
